

Micronutrient IV Therapy

Vitamins, minerals, amino acids, and antioxidants are key players that maintain the metabolic processes in our bodies. These micronutrients can be obtained from a healthy diet, however, when under acute or chronic illness, only a small percentage can be absorbed.

IV micronutrient therapy is a customized blend of nutrients that are delivered in higher concentrations. This provides the cells with appropriate nutrients for rapid healing at a therapeutic dosage.

BENEFITS of IV THERAPY

**IMPROVES
ENERGY**

**IMPROVES SLEEP,
REDUCES STRESS**

**IMPROVES
MOOD**

**SUPPORTS THE
IMMUNE SYSTEM**

**SUPPORTS
DETOXIFICATION**

AND ANTI-AGING
EFFECTS**

Important Information

- Treatment times may vary from 15 minutes to 2-3 hours, depending on the type of IV procedure.
- Effects can be felt immediately and results can last anywhere from several days all the way up to several weeks.
- Beyond adhering to the highest safety and sterilization procedures, a complete health history and lab workup is performed prior to the first treatment.

Treatment Options

Intramuscular Therapy

B12 shot

Methylcobalamin is given to ensure absorption and bioavailability. This is a major component of red blood cell production and the co-factor needed for many neurological processes.

Intravenous Therapy

Nutrient Pushes

Meyer's Cocktail

Vitamin C, B-complex, magnesium, methylcobalamin, calcium, zinc, and selenium. This treatment boosts the immune system, relieves migraines, improves fatigue, decreases seasonal allergies, and supports cardiovascular health. Ideal for anyone looking to improve overall health.

Glutathione Push

A potent antioxidant that supports detoxification pathways, protects from free radical damage, and premature aging. This is a standalone treatment or can be added to any drip formula.

Nutrient Drips

Immune Support

Increased amounts of vitamin C, trace minerals, and B-vitamins to supercharge the immune system. Ideal for those feeling under the weather or wanting to prevent the common cold/flu.

Beauty

Increased amounts of vitamin C, biotin, B-vitamins, and trace minerals to help support collagen and biotin production to improve complexion. Perfect for those that are looking to enhance hair growth and maintain glowing, youthful appearing skin. To enhance results even more, consider pairing with a glutathione push.

Energy

Increased amounts of vitamin C, selenium, zinc, and dexpanthenol (B5) to help support mitochondrial function, boost cellular energy, and improve exercise capacity. Helpful for those that are chronically stressed or have a major event coming up.

Calm

Magnesium, dexpanthenol (B5), pyridoxine (B6), and trace minerals to help support adrenal function, release tense muscles, and promote a relaxation state. Beneficial for those that need to support the parasympathetic nervous system.
